

Canada's amazing **boreal forest**

+ holds **85 per cent** of Canada's remaining wetlands

+ **stores more carbon** than any other ecozone on Earth – almost twice as much as tropical forests

+ is rich in biodiversity, with **85 species of mammals, 130 species of fish and 300 species of birds**

+ provides vital breeding and nesting habitat for **1-3 billion migratory birds**

+ **supplies clean water**, by filtering the largest surface area of fresh-water on the planet

+ **buffers extreme weather**, holding water in floods and storing it in droughts

+ is homeland for more than **600 Indigenous communities**

Maintaining a healthy boreal forest is our greatest conservation opportunity. **With your help, we can make a difference.**
